## Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).  
Required fields are marked with an asterisk (\*).

1

### General

Owner \*

arpan2208

Repository name \*

GCET COLLEGE IT1 Time Table

✔ Your new repository will be created as GCET-COLLEGE-IT1-Time-Table-.  
The repository name can only contain ASCII letters, digits, and the characters ., -, and \_.

Great repository names are short and memorable. How about [ideal-meme](#)?

### Description

HTML Web Development

20 / 350 characters

2

### Configuration

**Choose visibility \***  
Choose who can see and commit to this repository

Public

**Add README**  
READMEs can be used as longer descriptions. [About READMEs](#)

On ☒

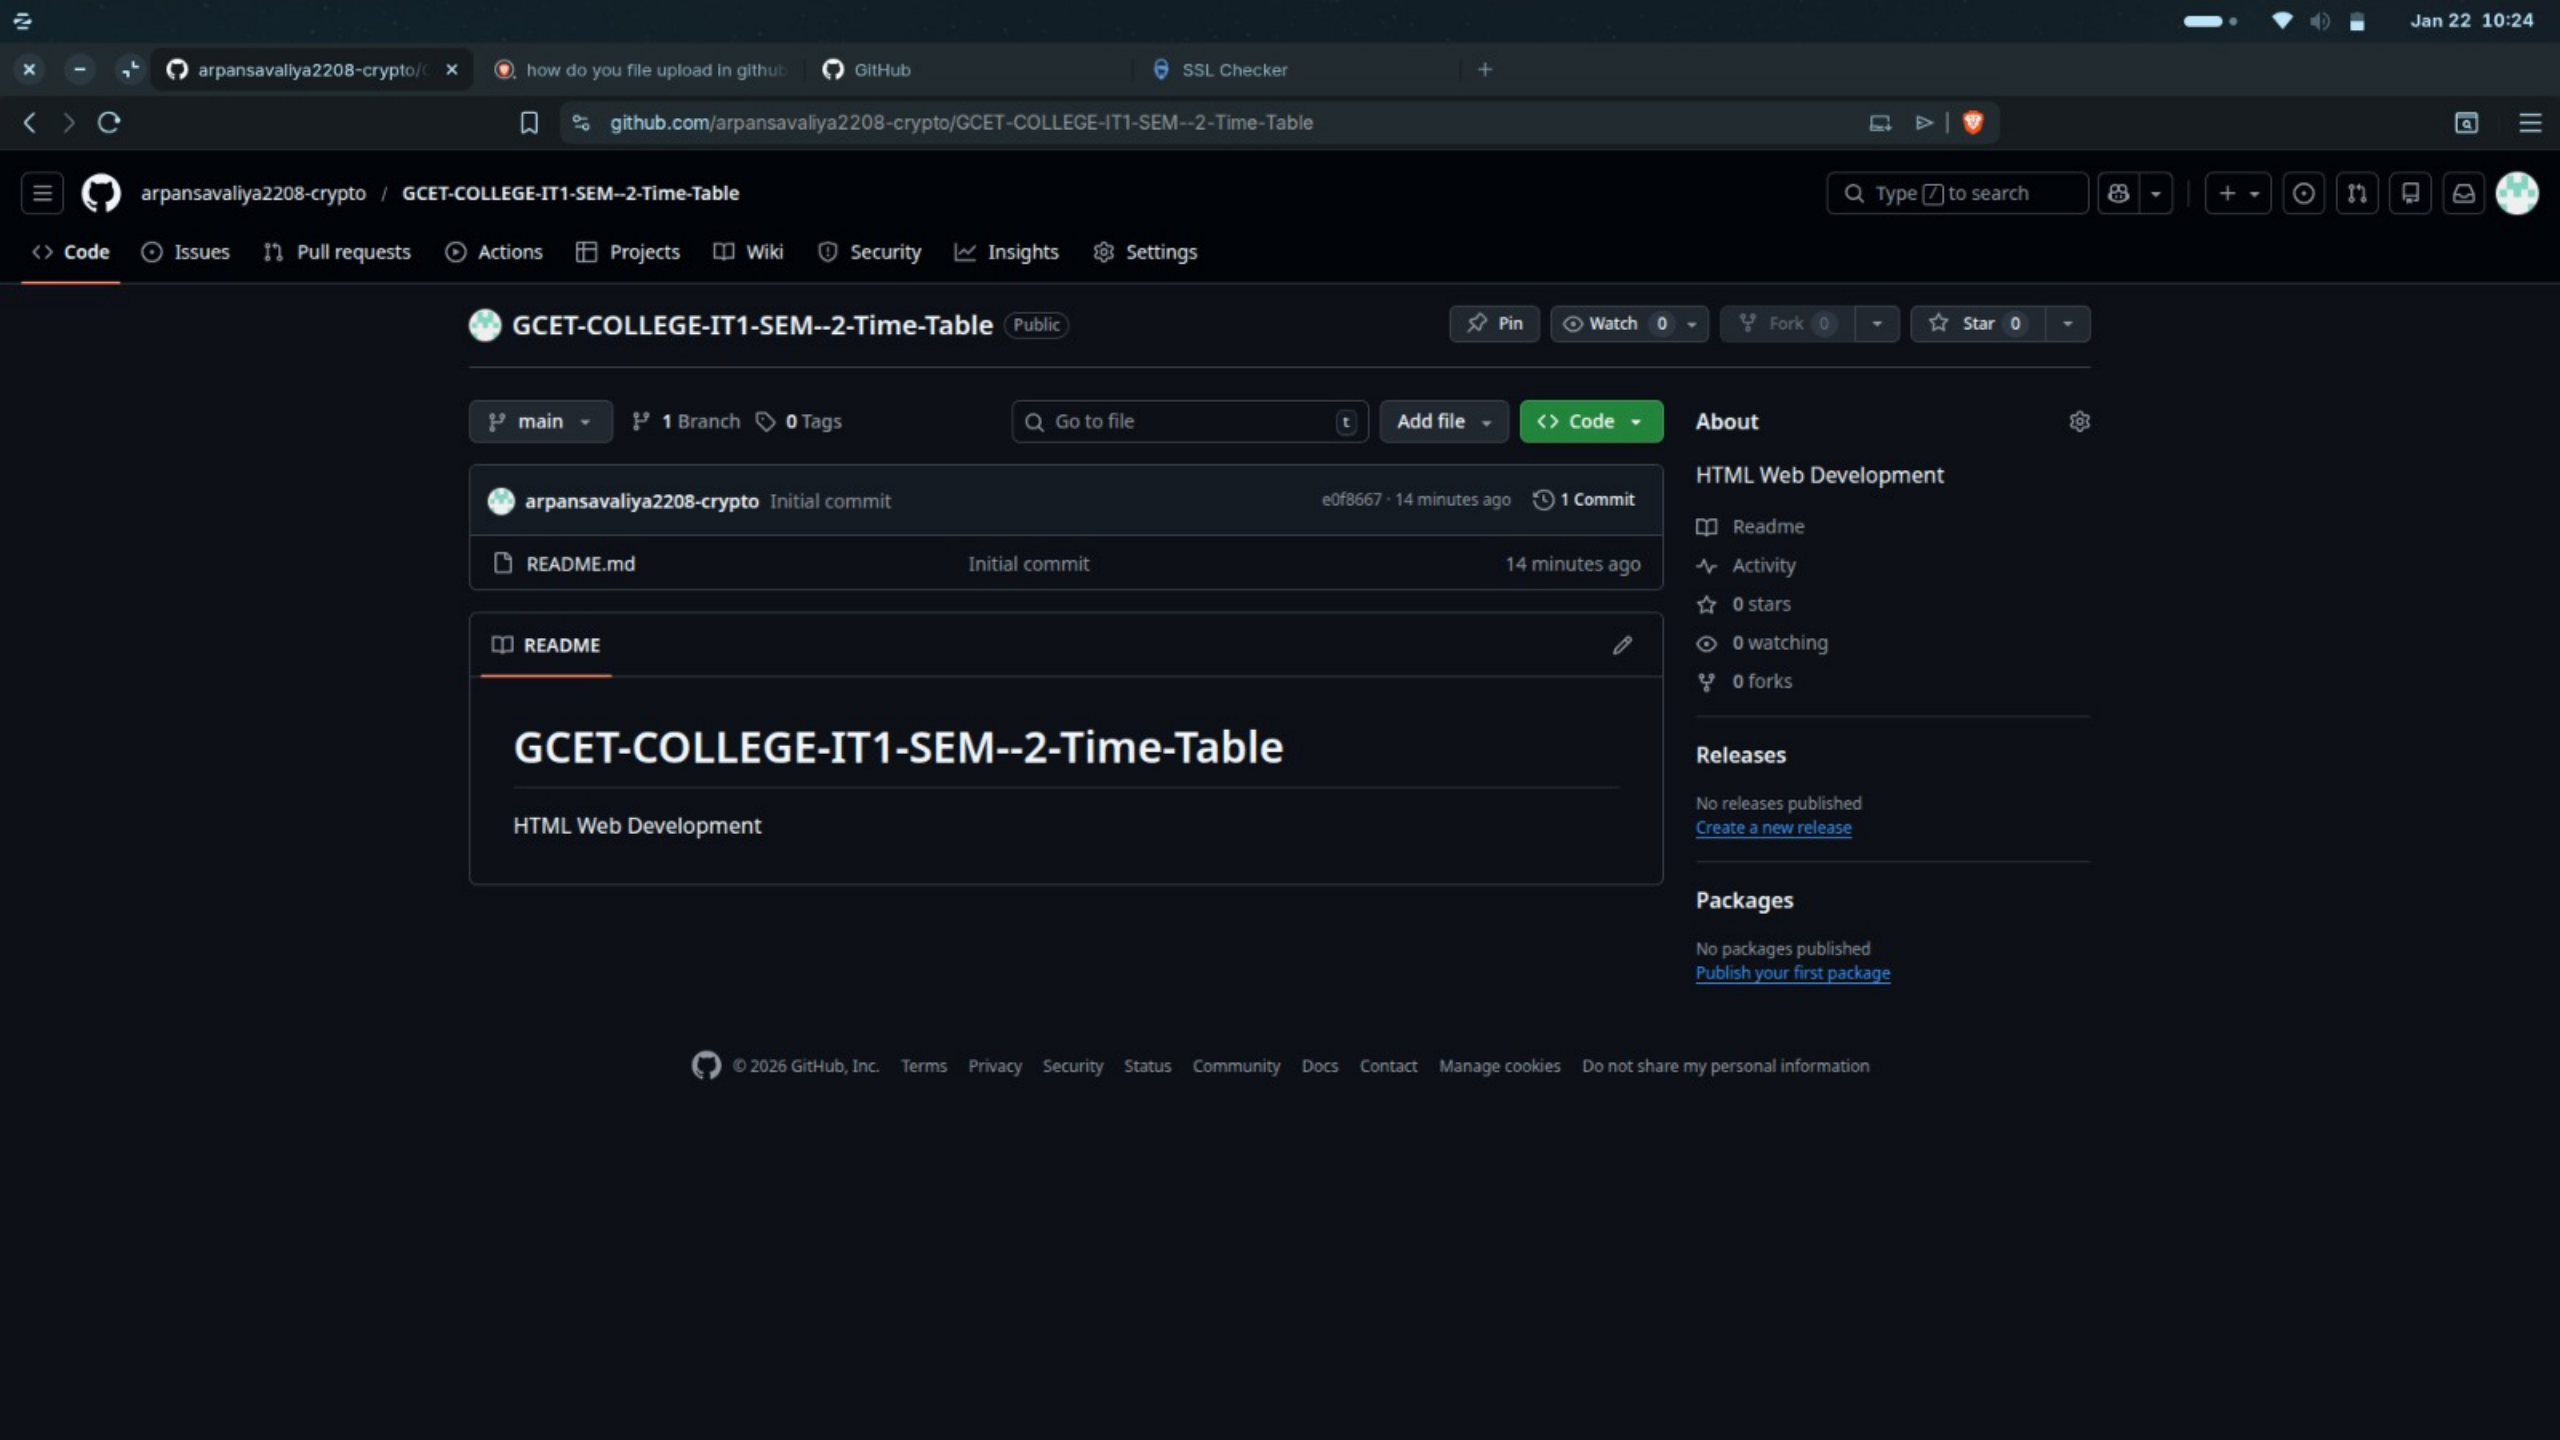

**Add .gitignore**  
.gitignore tells git which files not to track. [About ignoring files](#)

No .gitignore

**Add license**  
Licenses explain how others can use your code. [About licenses](#)

No license

☐

Template repository

Template repositories let users generate new repositories with the same directory structure and files. [Learn more about template repositories.](#)

☐

Require contributors to sign off on web-based commits

Enabling this setting will require contributors to sign off on commits made through GitHub's web interface. Signing off is a way for contributors to affirm that their commit complies with the repository's terms, commonly the [Developer Certificate of Origin \(DCO\)](#). [Learn more about signing off on commits.](#)

Default branch

The default branch is considered the "base" branch in your repository, against which all pull requests and code commits are automatically made, unless you specify a different branch.

main

Releases

☐

Enable release immutability

Disallow assets and tags from being modified once a release is published.

Social preview

Upload an image to customize your repository's social media preview.

Images should be at least 640×320px (1280×640px for best display).

[Download template](#)

Edit

Features

☒

Wikis

Wikis host documentation for your repository.

When creating source code archives, you can choose to include files stored using Git LFS in the archive.

☐ **Include Git LFS objects in archives**

Git LFS usage in archives is billed at the same rate as usage with the client.

## Pushes

☐ **Limit how many branches and tags can be updated in a single push**

[Preview](#)

Pushes will be rejected if they attempt to update more than this. [Learn more about this setting](#), and send us your [feedback](#).

## Issues

After merging a pull request, linked issues can be closed automatically.

☒ **Auto-close issues with merged linked pull requests**

Whenever linked pull requests have merged, auto-close the issue.

## Danger Zone

**Change repository visibility**

This repository is currently public.
